

ZUHAIR ABBAS

syedabbas6575@gmail.com | +91 7011306929 | 📍 Noida, India [Portfolio](#) | [Linkedin](#) | [Leetcode](#)

Skills

Frontend & Platform Engineering:

TypeScript, JavaScript, Angular, React, Node.js, Redux, Nx, Micro Frontends, Module Federation, Monorepos, RxJS, NgRx, React Query, Web Performance Optimization

AI, Data & Tooling:

OpenAI APIs (ChatGPT), Claude APIs, Token Management, Prompt Engineering, AI Agents, Vibe Coding, MongoDB, PostgreSQL, Firebase, CI/CD Pipelines, OAuth 2.0, Jest

Work Experience

Hashedin by Deloitte | Software Engineer - II | [Link](#)

Jul 2024 – Present

- Led end-to-end delivery of Deloitte's Vision Portal from greenfield to production in under **10 months**, replacing a legacy system and supporting **2.5M+ active users with 99.9% uptime**, using Angular with **Micro Frontend Architecture** to enable **30% faster releases**.
- Built internal application based on **React platforms (Hashedin.com)**, improving **Lighthouse performance scores by 40%+** and enhancing discoverability, performance, and Core Web Vitals.
- Designed **localized, multi-language interfaces** for users across **120+ countries**, reducing onboarding time by **25%**, and reused the same UX patterns across **internal Deloitte tools** used by **3K+ employees**.
- Implemented **custom theming and white-label UI frameworks** for enterprise clients, including **Google and Amazon**, reducing UI customization effort by **50%** and enabling consistent branding across **15+ applications**.
- Integrated **ServiceNow ticketing via REST APIs**, increasing in-portal ticket creation by **34%** and reducing resolution time by **22%**, while embedding **AI-powered agents** to automate workflows and handle **30–35% of repetitive queries**.

WNS | Software Engineer

Jul 2022 – Jun 2024

- Contributed across the **full SDLC**, from requirement analysis to production deployment, collaborating with cross-functional teams to deliver scalable enterprise applications.
- Built a **ChatGPT-inspired Generative AI interface** using **GPT-4 APIs and token-based orchestration**, integrated with internal SOPs and knowledge bases to enable conversational assistance, task automation, and context-aware responses.
- Implemented **dynamic theme switching** using Angular theming, allowing seamless runtime transitions between multiple UI themes via user-controlled toggles.
- Developed **data visualizations using D3.js**, showcasing GPT usage metrics and insights, resulting in a **28% increase in user engagement**.
- Upgraded **Google Identity Services** with one-tap login, improving authentication performance by **20%** and enhancing user sign-in experience.

Education

Jamia Hamdard University, New Delhi

2018 - 2022

- Bachelor of Technology (CSE) in Computer Science Engineering | **CGPA: 8.09**

Achievement | [Link](#)

Recognized with two **Spot Awards** within the first year for building dynamic, scalable API-driven solutions that enhanced content delivery and improved overall engineering efficiency.
