

ZUHAIR ABBAS

syedabbas6575@gmail.com | +91 7011306929 | 📍 Noida, India [Portfolio](#) | [Linkedin](#) | [Leetcode](#)

Summary

AI Frontend Engineer with 4+ years of experience specializing in enterprise frontend architecture and AI integration. Experienced in Micro Frontends, Module Federation, and building production-grade AI-powered applications using Claude and OpenAI APIs. Anthropic-certified (CCF-A).

Skills

TypeScript, JavaScript, Angular, React, Node.js, Redux, Nx, Micro Frontends, Module Federation, RxJS, NgRx, React Query, OpenAI APIs, Claude APIs, AI Agents, MCP, Prompt Engineering, MongoDB, PostgreSQL, Firebase, OAuth 2.0, CI/CD, Jest

Work Experience

Hashedin by Deloitte | Software Engineer - II | [Link](#)

Jul 2024 – Present

- Led end-to-end delivery of Deloitte's Vision Portal from greenfield to production in under **10 months**, replacing a legacy system and supporting **2.5M+ active users** with 99.9% uptime using Angular with **Micro Frontend Architecture**, enabling **30% faster releases**.
- Currently building **enterprise MCP connectors for Google Agentspace** (Google's Gemini-powered enterprise AI platform), integrating third-party platforms to enable AI-driven workflows for enterprise clients.
- Designed **localized, multi-language interfaces** for users across **120+ countries**, reducing onboarding time by **25%**, and reused the same UX patterns across **internal Deloitte tools** used by **3K+ employees**.
- Implemented **custom theming and white-label UI frameworks** for enterprise clients, including **Google and Amazon**, reducing UI customization effort by **50%** and enabling consistent branding across **15+ applications**.
- Integrated **ServiceNow ticketing via REST APIs**, increasing in-portal ticket creation by **34%** and reducing resolution time by **22%**, while embedding **AI-powered agents** to automate workflows and handle **30–35% of repetitive queries**.

WNS | Software Engineer

Jul 2022 – Jun 2024

- Built a **Generative AI assistant for Ocean Network Express (ONE)**, one of the world's largest container shipping lines, using GPT-4 APIs and token-based orchestration — enabling **25,000+ employees** to handle filing, route checking, and logistics queries conversationally, reducing manual lookup time across global operations.
- Developed **real-time admin dashboards using D3.js** to surface logistics and analyst metrics for operations teams, improving data visibility and enabling faster, data-driven decisions at scale.
- Modernized enterprise authentication by integrating **Google One-Tap and SSO login**, reducing sign-in friction and improving security posture for a portal serving a global workforce.
- Led **Angular migration from v9 to v16**, eliminating deprecated APIs, improving build performance, and future-proofing the codebase for a large-scale enterprise logistics platform.

Achievements & Certifications

- Recognized with two [Spot Awards](#) within the first year for building dynamic, scalable API-driven solutions that enhanced content delivery and improved overall engineering efficiency.
- Earned the [Claude Certified Architect – Foundations](#) credential issued by Anthropic — demonstrating the ability to design and build production-grade applications using Claude Code, the Claude Agent SDK, the Claude API, and MCP.

Education

Jamia Hamdard University, New Delhi

2018 - 2022

Bachelor of Technology (CSE) in Computer Science Engineering | **CGPA: 8.09**
